

A Brilliant New Star Circles the Earth

Let Us Introduce You To The Meyers 200

Peter Gluckmann of San Francisco, Cal., has relied upon the safety, performance and dependability of a new Meyers 200 to complete a flight of 28,000 miles around the earth.

Mr. Gluckmann has successfully flown over all of the largest oceans and continents on the globe during the past seven years and as long as two years ago, he entertained the thought of a flight around the earth.

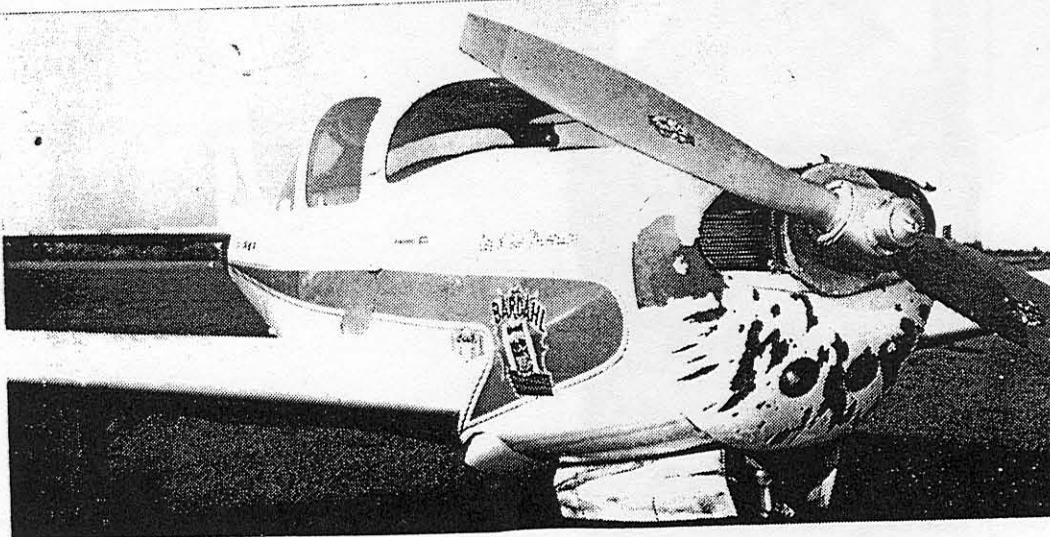

This called for a thoroughly reliable aircraft, engine, propeller, radio and other important items necessary to execute such a flight. Upon evaluation of currently available equipment by Mr. Gluckmann, it was decided to rest his case on a Meyers 200 airplane, with a Continental 10-470-D fuel injection engine producing 260 HP., and McCauley propeller, all of which in the opinion of Mr. Gluckmann were best qualified

for the job at hand.

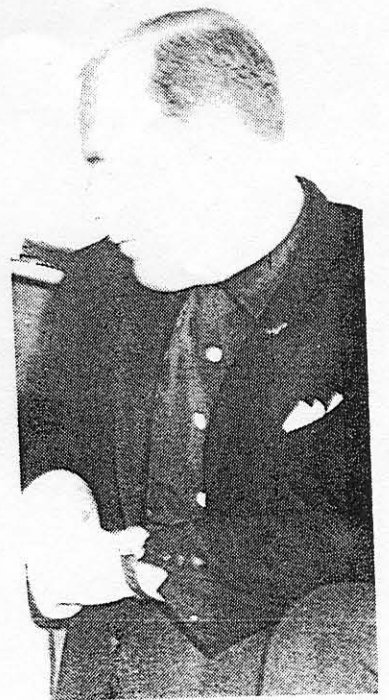

Completion of this spectacular achievement clearly demonstrates the stamina of both man and machine. What this sturdy, and dependable airplane has done for Mr. Gluckmann, you can be sure it will also do for you.

There is more COMFORT, more EFFICIENCY, better all-around PERFORMANCE, less maintenance, at less initial cost in the MEYERS 200.

MR. EXECUTIVE—Here is the aircraft designed with you in mind. When you experience the pleasure of cruising through the skies at over 200 miles per hour in relaxing comfort, you will get a feeling of security you can enjoy only in the finest, and most modern means of transportation. THIS IS YOUR PERSONAL AIRLINER TO ANYWHERE.

McCAULEY METALMATIC PROPELLER WAS USED IN GLOBE-CIRCLING FLIGHT.
